	B. Growing Greener II Projects	30

## **Summary**

In May 2005, Pennsylvania voters approved through a referendum borrowing \$625 million for the Growing Greener II program "for the maintenance and protection of the environment, open space and farmland preservation, watershed protection, abandoned mine reclamation, acid mine drainage remediation and other environmental initiatives". In July 2005, Governor Rendell signed Act 45, the Growing Greener II legislation that directs how the Growing Greener II funds are to be distributed.

### **Growing Greener II Bond Issues and Debt Service**

As of January 2010, the Commonwealth had issued \$384.5 million of the \$625 million approved in Growing Greener II bonds. The bonds have interest rates between 3.45 percent and 5.50 percent, with varying maturity dates through FY 2028-29. Of the \$240.5 million principal amount of debt remaining, the Commonwealth anticipates issuing \$120 million in bonds in FY 2009-10 and \$121 million in FY 2010-11.

The funds to make the principal and interest payments for the Growing Greener II bonds come from the Environmental Stewardship Fund<sup>1</sup>. The primary source of revenue for the Environmental Stewardship Fund is the \$4.25 per ton disposal fee for solid waste disposed of at any municipal waste landfill, which in recent years has ranged from \$65 million to \$84 million annually (including earned interest).

Of this amount, approximately \$30 million is currently being used for debt service to repay the principal and interest on the GGII bonds. The remaining \$35-54 million is used to support other environmental initiatives. However, the amount needed for GGII debt service will increase to approximately \$50 million once the remaining \$240.5 million in bonds is issued. The Governor's Budget Office projects this will leave only about \$15 million remaining for other Environmental Stewardship Fund projects.

## **Use of Growing Greener II Funds**

The Growing Greener Bond Fund was created by Act 2005-45 to receive and distribute the proceeds from the sale of Growing Greener II bonds to Commonwealth agencies. The table below shows the uses of the GGII bond funds.

<sup>&</sup>lt;sup>1</sup> Procedurally, the Environmental Stewardship Fund makes payments to the Growing Greener II Sinking (Debt Repayment) Fund. Principal and interest payment are then made from the sinking fund.

## Growing Greener Bond Fund Allocations and Expenditures (\$ in Millions)

	Act 45 <u>Allocations</u>	Actual Expenditures (as of 6/30/09)	Actual Plus Estimated (Through June 30, 2011)
Agriculture	\$ 80.0	\$ 74.5	\$ 80.0
Community and Economic Development	50.0	45.0	71.8 <sup>a</sup>
Conservation and Natural Resources	217.5	148.9	216.6
Environmental Protection	230.0	94.5	212.2
Fish and Boat Commission	27.5	10.3	30.1
Game Commission	20.0	10.8	<u>17.4</u>
Total	\$625.0	\$371.6	\$628.0

<sup>&</sup>lt;sup>a</sup> Includes \$15 million for Industrial Sites Reuse. Under Act 45, DEP is authorized to allocate up to \$5 million annually to DCED for this purpose.

As the table shows, by June 30, 2011, all the GGII funds available to the Department of Agriculture for farmland preservation will have been expended,<sup>2</sup> as will all or virtually of the GGII funds available to DEP, DCNR, DCED, Fish and Boat Commission, and the Game Commission. Although the funds may not be expended until 2011, each department has reported that virtually all the funds not yet spent are already committed to GGII environmental projects and that they can undertake few if any new GGII projects.

The report lists each of the 1,535 projects that have been awarded Growing Greener II funding. Many of these projects are unique and do not have performance or outcome metrics that can be quantified or aggregated. However, to the extent that we were able to aggregate outcome measures, we found Growing Greener II funds were used to:

- Purchase 316 farmland preservation projects which preserved 33,714 acres of farmland in perpetuity (Department of Agriculture).
- Create 1,500 jobs, improve 41 buildings, leverage \$140.4 million in private dollars, remediate 1 site, and construct 4 new buildings (Department of Community and Economic Development).
- Purchase, either outright or through conservation easements, 42,357 acres of open spaces (Department of Conservation and Natural Resources).
- Remediate 1,619 acres of abandoned mine lands, plug 239 orphaned and/or leaking gas and oil wells (Department of Environmental Resources).

<sup>&</sup>lt;sup>2</sup> The Department of Agriculture reported that all its GGII farmland preservation funds had been expended or committed as of June 30, 2009.

## I. Introduction

House Resolution 2009-17 (Appendix A) calls on the Legislative Budget and Finance Committee to review the Commonwealth's Growing Greener II initiative.

### Study Objectives

HR 17 is specific in the objectives of this study, which are to determine:

- 1. the overall amount of bond funding authorized, the amount issued, the amount remaining to be issued and a schedule of debt service on the bond issuance;
- 2. the total amount of funds allocated to each agency, a compilation of how the allocated funds were spent and the amount of remaining funds to be allocated by the agency;
- 3. the costs and benefits of the program; and
- 4. the projects completed under the County Environmental Initiative Program, including the number and type of projects by county, the amount of funding requested and provided to each county and an evaluation of the costs and benefits of the projects implemented under the program.

The resolution also calls on the LB&FC to "make a thorough study of various proposals for continued funding for environmental initiatives . . . including recommendations for legislation." We did not identify any specific proposals for continued funding, but were informed that a coalition of about 20 primarily environmental, conservation, and recreational organizations has formed under the name Renew Growing Greener Coalition. The coalition is exploring various possible funding sources, including natural gas severance taxes, the Oil and Gas Lease Fund, a bottle bill (surcharge on beverage containers), bond issue, etc., in an effort to generate \$200 million annually in sustainable funding for Growing Greener-type programs and projects.

## Methodology

Information on the GGII bond indebtedness and debt service was obtained from the Office of the Budget. Information on the amount awarded to specific GGII projects by the various agencies was provided by the Governor's Policy Office. Information on the status of individual projects (i.e., whether the project has yet to be started, is underway, or is completed) was not available, so the report only lists the projects that have been approved for funding. Information on the benefits

(outcomes) of the various projects was, to the extent it was available, provided by the individual agencies.

As noted above, we could not identify any specific proposals for continued funding of the Growing Greener environmental, conservation and recreational initiatives, and therefore do not have recommendations regarding this aspect of the resolution.

### Acknowledgements

We appreciate the cooperation provided by Ms. Patricia Allan in the Governor's Policy Office in assembling information on the Growing Greener II projects, particularly those funded through the County Environmental Initiative program. We also appreciate the cooperation provided by the various departments and commissions in providing us with information on the outcomes (benefits) of the funded projects.

## **Important Note**

This report was developed by the Legislative Budget and Finance Committee staff. The release of this report should not be construed as an indication that the Committee or its individual members necessarily concur with the report's findings and recommendations.

Any questions or comments regarding the contents of this report should be directed to Philip R. Durgin, Executive Director, Legislative Budget and Finance Committee, P.O. Box 8737, Harrisburg, Pennsylvania 17105-8737.

## II. Growing Greener II Bond Issues and Debt Service

In May 2005, Pennsylvania voters approved through a referendum borrowing \$625 million for the Growing Greener II program "for the maintenance and protection of the environment, open space and farmland preservation, watershed protection, abandoned mine reclamation, acid mine drainage remediation and other environmental initiatives". In July 2005, Governor Rendell signed Act 45, the Growing Greener II legislation, (the Growing Greener Environmental Stewardship and Watershed Protection Enhancement Authorization Act) that directs how the Growing Greener II funds are to be distributed.

#### **Bond Issues**

In November 2005, Pennsylvania sold the first bonds pertaining to the Growing Greener II program as part of a larger general obligation sale. As shown in the table below, subsequent bond issues have resulted in total Growing Greener II bond obligations of \$384.5 million (principal only) as of June 30, 2009.

Table 1

#### **Growing Greener II Bonds Issued**

(As of September 30, 2009) (\$ in Millions)

<u>lssuance</u>	<u>Date</u>	Principal Amount Issued
Second Series of 2005	November 29, 2005	\$ 50.0
First Series of 2006	May 23, 2006	133.0
Second Series of 2006	December 5, 2006	27.0
First Series of 2007	May 22, 2007	0.0
Second Series of 2007	December 3, 2007	80.0
First Series of 2008	May 20, 2008	29.5
Second Series of 2008	December 3, 2008	25.0
First Series of 2009	March 10, 2009	0.0
Second Series of 2009	May 8, 2009	40.0
Total		\$384.5
Source: Bond Prospectuses.		

The bonds were issued with interest rates between 3.45 percent and 5.50 percent, with varying maturity dates through FY 2028-29. Of the \$240.5 million principal amount of debt remaining, the Commonwealth anticipates issuing \$120 million in bonds in FY 2009-10 and \$121 million in FY 2010-11.

#### **Debt Service**

Table 2 shows the debt service (repayment of principal and interest) for the \$384.5 million in net debt issued as of June 30, 2009. The debt service will, of course, increase significantly when the \$240.5 million in bonds anticipated to be issued after June 30, 2009, are included.

Table 2

## **III. Uses of Growing Greener II Funds**

Understanding the flow and uses of the Growing Greener II programs requires understanding the relationships between three different funds: the Growing Greener Bond Sinking Fund (the debt service fund discussed in Chapter II), the Growing Greener Bond Fund, and the Environmental Stewardship Fund. The role and relationship of these funds is shown in Exhibit 1.

Exhibit 1 **Funds Involved in Growing Greener II** → Treasury (minor amount) → Agriculture Proceeds From > DCED Growing Growing Greener → DCNR Greener II Bond Fund → DEP **Bond Sales** → PFBC → PGC Treasury for **Growing Greener** Payment of Bond Sinking > Principal and Interest on GGII Fund (Debt Service) Bonds Environmental \$4.25/Ton Stewardship Agriculture Disposal Fee Fund → DCED → DEP → Infrastructure Investment Authority Source: Developed by LB&FC staff.

**Growing Greener Bond Fund.** The Growing Greener Bond Fund was created by Act 2005-45 to receive and distribute the proceeds from the sale of Growing Greener II bonds to Commonwealth agencies to fund Growing Greener II projects. Table 4 shows the beginning and ending balances and the receipts and disbursement from the Growing Greener Bond Fund.

Environmental Stewardship Fund. The Environmental Stewardship Fund is a special revenue fund, meaning the monies it receives can only be spent for purposes prescribed in law and for which the revenues were collected. The primary source of revenue for the Environmental Stewardship Fund is the \$4.25 per ton disposal fee for all solid waste disposed of at any municipal waste landfill. As shown in Table 5 below, total fund revenues have ranged from \$65 million to \$84 million annually (including earned interest).

Expenditures from the Environmental Stewardship Fund have ranged from about \$70 million to \$85 million annually, which includes the debt service payments made to the Growing Greener Bond Sinking Fund for the Growing Greener bond principal and interest payments (see Table 6).

The Governor's Budget Office projects that revenues to the Environmental Stewardship Fund will remain flat at about \$65 million for at least the next five fiscal years. Once all Growing Greener II bonds are issued, debt service payments will be about \$50 million annually, leaving only about \$15 million to fund additional Environmental Stewardship Fund projects.

Table 7 shows how, by department, Act 45 allocates the proceeds from the Growing Greener II bond sale and how much the departments have spent so far on GGII projects. $^3$ 

<sup>3</sup> Includes County Environmental Initiative Program projects.

Table 7

## Growing Greener Bond Fund Allocations and Expenditures (\$ in Millions)

	Act 45 <u>Allocations</u>	Actual Expenditures (as of 6/30/09)	Actual Plus Estimated (Through June 30, 2011)
Agriculture	\$ 80.0	\$ 74.5	\$ 80.0
Community and Economic Development	50.0	45.0	71.8 <sup>a</sup>
Conservation and Natural Resources	217.5	148.9	216.6
Environmental Protection	230.0	94.5	212.2
Fish and Boat Commission	27.5	10.3	30.1
Game Commission	20.0	10.8	<u>17.4</u>
Total	\$625.0	\$371.6	\$628.0

<sup>&</sup>lt;sup>a</sup> Includes \$15 million for Industrial Sites Reuse (see Table 4). Under Act 45, DEP is authorized to allocate up to \$5 million annually to DCED for this purpose.

Source: Act 2005-45, Governor's Executive Budget Documents.

The average useful life of the facility or project must approximate the average term of the bond issued to finance it (typically 20 years). Eligible applicants for Growing Greener II funds include local governments, county and municipal authorities, and not for-profit organizations. For-profit entities and private individuals may receive these funds as a sub-grant from an eligible applicant for an eligible project.

Growing Greener II funds have been used to fund, either fully or in part, 1,535 projects in the various departments. Additional detail on the use of GG II funds is shown below:

### **Agriculture**

*Purchase of County Easements.* The Department of Agriculture reports that through the end of FY 2008-09, it used all of its \$80 million in Grower Greener II to fund 316 farmland preservation (easement) projects, which preserved 33,713 acres in perpetuity at a cost of \$79.31 million (see Table 8).

Table 8

Growing Greener II Farmland Conservation Projects					
	Number of <u>Farms</u>	Number of <u>Acres</u>	GGII Funds <u>Awarded</u>		
GGII 06/07 Purchases	140	14,665	\$39,083,578		
GGII 07/08 Purchases	126	13,402	30,157,937		
GGII 08/09 Purchases	50	5,646	10,072,204		
TotalBalance for Pending Block Grant	316	33,713	\$79,313,719		
Easement Purchases				\$686,281	

Source: PA Department of Agriculture

#### Community and Economic Development

Act 45 of 2005, the act authorizing the use of Growing Greener II funds, provides for up to \$50 million to the Department of Community and Economic Development "for main street development and downtown redevelopment related to smart growth, including improvements to existing water and wastewater infrastructure." Table 9 shows the number of projects funded by DCED with Growing Greener II funds. Often the DCED Growing Greener II funds comprise only a small portion of a much larger project.

Table 0

l able 9							
Use of Growing Greener Funds by DCED (\$ in Millions)							
<u>Y</u> 6	ear # of Pro	o <u>jects</u> GGII F <u>Awar</u>					
2006.	10	\$ 4.6	75				
2007.	19	9.3	47				
2008.	26	11.9	69				
2009	<u>11</u>	7.2	<u>29</u>				
Tota	l 66	\$33.2	20				
Source: Governor's Policy Office.							

DCED reported that its GGII projects have resulted in 1,500 jobs created, 41 buildings improved, \$140.4 million in private dollars leveraged, 1 site remediation, and 4 new buildings constructed.

#### Conservation and Natural Resources

DCNR reports using Growing Greener II funds to help support 441 projects totaling \$190.7 million through June 30, 2009. Table 10 shows the number and types of projects funded.

Table 10

DCNR Use of Growing Greener Funds (\$ in Millions)						
	<u>Projects</u>	GGII Funds <u>Awarded</u>				
Community Parks	234	\$ 35.554				
Open Space	75	61.915				
State Park and Forest Infrastructure	<u>132</u>	93.273				
Total	441	\$190.743				
Source: Governor's Policy Office.						

Under Act 45, DCNR is to spend at least \$100 million of its \$217.5 million allocation on parks and forest facility rehabilitation and \$90 million on open space conservation.

The 75 open space projects acquired a total of 42,357 acres (including the purchase of 16 conservation easements on 4,707 acres), ranging in size from 3 acres to a 6,000 acre tract of forestland in Clarion, Jefferson, and Forest counties adjacent to State Game Lands 111 and Laurel Ridge State Park.

#### **Environmental Protection**

DEP reports using Growing Greener II funds to help support 685 projects totaling \$183.6 million through June 30, 2009. Table 11 shows the number and types of projects funded.

Table 11

#### **DEP Use of Growing Greener Funds**

(\$ in Millions)

	<u>Projects</u>	GGII Funds
Abandoned Mine Reclamation	46	\$ 38.72
Acid Mine Drainage	16	11.42
Brownfields	25	13.27
Drinking /Wastewater	104	15.76
Energy Development	72	31.70
Watershed Protection	400	68.13
Gas and Oil Well Plugging	13	1.94
Stream Improvement	1	0.20
Dams	<u>8</u>	2.46
Total	685	\$183.62

Source: Governor's Policy Office.

Under Act 45, DEP is to spend at least \$60 million of its \$230 million allocation on acid mine drainage and mine cleanup efforts, no more than \$10 million annually on Energy Development Authority projects, and no more than \$5 million annually on brownfield remediation.

Because many of the DEP projects are unique, for most of the project types it was not possible to develop meaningful performance metrics beyond simply the number of projects funded. For the two project types that did lend themselves to outcome measures (Abandoned Mine Reclamation and Gas and Oil Well Plugging), we found that the 46 abandoned mine reclamation projects were to remediate 1,619 acres of abandoned mine lands, and the 13 Gas and Oil Well Plugging projects are to plug a total of 239 orphaned and/or leaking wells.

#### Fish and Boat Commission

The Fish and Boat Commission reports using Growing Greener II funds to help support 9 projects totaling \$26.64 million as of June 30, 2009.<sup>4</sup> The projects were so varied it was not possible to develop quantifiable outcome measures.

<sup>&</sup>lt;sup>4</sup> Two other projects, a \$2.87 million project at the Linesville Hatchery and a \$1 million project at the Union City Hatchery, have been put on hold pending information on the actual expenditures for the other Fish and Boat Commission projects.

#### Game Commission

The Game Commission reports that as of June 30, 2009, it had used Growing Greener II to support 29 different projects at a total cost of \$7.69 million in Growing Greener II funds. The projects were so varied it was not possible to develop quantifiable outcome measures.

#### County Environmental Initiative Program

Act 45 also creates the County Environmental Initiative Program to help fund capital improvement projects. The act allocates \$90 million to this initiative, but the funds are to come from the funds allocated to the various departments as outlined in Table 7. The county initiative projects are therefore included in the department totals shown above.

Table 12 shows the amounts counties are eligible to receive.

Table 12

#### **County Allocations for the County Environmental Initiative Program**

	Act 45 Allocation
1 <sup>st</sup> , 2 <sup>nd</sup> , and 2 <sup>nd</sup> A Class Counties	\$2,700,000
3 <sup>rd</sup> Class Counties	1,750,000
4 <sup>th</sup> and 5 <sup>th</sup> Class Counties	1,390,000
6 <sup>th</sup> , 7 <sup>th</sup> , and 8 <sup>th</sup> Class Counties	1,000,000

Source: Act 45 of 2005

Under Act 45, counties are to be provided with an annual funding amount and may receive monies for up to six years from the effective date of the act (July 2005). In practice, however, the Governor's Office sent two letters (Fall 2005 and Spring 2006) to all the counties explaining how the program will work, how much the county is eligible to receive, and how to apply for funding. Since then, the program has been "first come, first served," and no additional letters have been sent.

Counties are to select projects in consultation with their county conservation districts. The number of projects and the amount awarded by department and project type is shown in Table 13. The eligible amount and the amount awarded by county (as of June 30, 2009) are shown in Tables 14 and 15. Table 16 shows the number of projects awarded by county as of June 30, 2009.

a Includes: Dams, Abandoned Mine Reclamation, Oil and Gas Well Plugging, Open Space- Parks & Forestry, and PA Energy Development Authority.

Source: Governor's Policy Office.

The remaining CEIP funds not yet awarded must be spent within the confines of the overall Act 45 allocations. For example, Act 45 allocates \$80 million for farmland preservation. Because that allocation is exhausted, no additional CEIP funds can be awarded for that purpose. The only categories that are not fully or almost fully exhausted are all within the Department of Environmental Protections: Energy Development, Brownfields, Abandoned Mine Reclamation, and Environmental Improvement (remining incentives, oil and gas well plugging, dam safety, sewer/drinking water innovative technology, and watershed protection).

#### THE GENERAL ASSEMBLY OF PENNSYLVANIA

## HOUSE RESOLUTION

No. 17

Session of 2009

INTRODUCED BY HARPER, ADOLPH, ARGALL, BARRAR, BEYER, BOYD, CALTAGIRONE, CAUSER, FAIRCHILD, GEORGE, GODSHALL, HENNESSEY, HUTCHINSON, MUSTIO, RAPP, READSHAW, SCAVELLO, SIPTROTH, STERN, SWANGER, VULAKOVICH, WATSON AND MAJOR, JANUARY 26, 2009

REFERRED TO COMMITTEE ON ENVIRONMENTAL RESOURCES AND ENERGY, JANUARY 26, 2009

#### A RESOLUTION

Directing the Legislative Budget and Finance Committee to review the Commonwealth's program of providing grants for environmental protection and improvement projects under the Growing Greener Program and the Community Conservation Partnerships Program.

WHEREAS, Open space, greenways, recreational trails, river corridors, fish and wildlife habitats, park and recreation areas protect the environment, conserve natural resources and add value to this Commonwealth and its communities; and

WHEREAS, The Commonwealth owns approximately 2.4 million acres of State park and forest lands which provide recreational, economic and educational opportunities for Commonwealth residents; and

WHEREAS, Pennsylvanians have embraced the need for funding dedicated to the improvement of our environment, the preservation of our farmland and open spaces and the reduction in the number of abandoned mines and hazardous sites; and

WHEREAS, Succeeding governors, over the last several years, have attempted to ensure that adequate funding exists to achieve these goals; and

WHEREAS, The General Assembly has expressed a willingness to achieve the goals set forth by these governors to ensure that future generations of Pennsylvanians are able to enjoy the beauty and splendor of Penn's Woods; and

WHEREAS, This willingness has been signified by the passage and subsequent enactment of one of the first State laws creating mandatory recycling, preserving farmland and open space, improving water quality and addressing the hazards of abandoned mines; and

WHEREAS, This commitment reached a zenith with the enactment of the Growing Greener initiative in 1999, 27 Pa.C.S. Ch. 61 (relating to environmental stewardship and watershed protection), which now provides a dedicated funding source for environmental improvement, farmland and open space preservation, abandoned mine cleanup and the Community Conservation Partnerships Program; and

WHEREAS, The General Assembly reaffirmed this commitment to environmental stewardship by authorizing the Growing Greener II initiative in 2005, which provided \$650 million in additional funding for watershed improvements, farmland and open space preservation, acid mine drainage mitigation and State park and forest infrastructure improvements; and

WHEREAS, The Growing Greener initiative's goals are laudable and important for the future protection and enhancement of this Commonwealth's environment and it provides a number of organizations with significant amounts of financial assistance, but the program is complex, involves a range of projects from

simple purchases to highly technical design efforts; and WHEREAS, The General Assembly has an obligation to the citizens of this Commonwealth to ensure that this investment is allocated wisely and achieves the results envisioned for the program; and

WHEREAS, The House of Representatives has an interest in ensuring the program is administered in accordance with the goals and intent of the program and has an interest in determining the costs and benefits associated with this investment in the environment and specifically with the investment made with the establishment of the Growing Greener II initiative; therefore be it

RESOLVED, That the Legislative Budget and Finance Committee undertake a comprehensive review of the environmental programs contained in 27 Pa.C.S. §§ 6115, 6116, 6117, 6118 and 6119, referred to as the Growing Greener II initiative, and prepare a report of its findings which shall, at a minimum, identify all of the following:

- (1) the overall amount of bond funding authorized, the amount issued, the amount remaining to be issued and a schedule of debt service on the bond issuance;
- (2) the total amount of funds allocated to each agency, a compilation of how the allocated funds were spent and the amount of remaining funds to be allocated by the agency;
- (3) a determination of the costs and benefits of the program, including a compilation of the miles of stream buffers restored, the total acres of wetlands restored, the total acres of abandoned mine lands reclaimed, the total number of abandoned oil and gas wells plugged, the total miles of acid mine drainage-impaired streams improved, the

total acres of open space and farmland preserved, the number and type of infrastructure improvements made to the State park and forest system and the number and type of energy and brownfield remediation projects;

- (4) a review of the projects completed under the County Environmental Initiative Program, including the number and type of projects by county, the amount of funding requested and provided to each county and an evaluation of the costs and benefits of the projects implemented under the program; and
- (5) a review and evaluation of the projects completed by the Pennsylvania Fish and Boat Commission and the Pennsylvania Game Commission, including a list of the number and types of projects completed and the costs and benefits associated with the projects implemented by each agency; and be it further

RESOLVED, That the committee make a thorough study of various proposals for continued funding for environmental initiatives to address watershed improvements, preservation of farmland and open space, reduction in the number of unremediated abandoned mine lands, for decreasing the number of streams impaired by acid mine drainage, for improving the infrastructure of the State park and forest system and for the Community Conservation Partnerships Program; and be it further

RESOLVED, That the committee make a report of its findings, including recommendations for legislation, to the House of Representatives within one year of the adoption of this resolution.

Multiple	\$7,779,480	DEP	PA Conservation Reserve Enhancement Program: Original, Northern Expan- sion and Ohio Basins	Watershed Pro- tection	Pennsylvania Associa- tion of Conservation Districts, Inc.	This project provides cost share funds to farmers enrolled in PA's Conservation Reserve Enhancement Program (CREP) in the 59 counties of the Susquehanna, Potomac and Ohio River Watersheds. The applicant enters into contracts with farmers to allocate cost.	2006	
Multiple	\$350,000	DEP	Fiscal Management for Quick Response of Growing Greener Type Projects	Watershed Pro- tection	Western Pennsylvania Coalition for Abandoned Mine Reclamation	The project will provide a means for quick payment of funds needed for emergency repair of previously funded restoration projects.  WPCAMR will act as an agent to provide quick pass through of funds.	2006	
Multiple	\$87,999	DEP	French Creek Priority Sub- watershed Riparian Restora- tion	Watershed Pro- tection	Western Pennsylvania Conservancy	To conduct education workshops and riparian restoration projects using minor mechanical engineering and vegetative stabilization on private, non- agricultural properties in 4 priority subwatersheds of the French Creek basin, specifically Conneautee Creek,	2006	

County	Award	Agency	Project Name	Project Type	Grantee/Contractor	Project Description	Year Awarded	County (CEIP) Selected
Multiple	\$163,300	DEP	French Creek Stormwater BMP	Watershed Pro- tection	French Creek Project of the Pennsylvania Envi- ronmental Council	Initiate an alternative stormwater Best Management Practices (BMP) project in the French Creek watershed in Crawford and Venango counties. The project will design and construct 10 to 15 alternative stormwater projects.	2006	
Multiple	\$111,566	DEP	Morrison Cove Agriculture BMP Implementation	Watershed Pro- tection	Western Pennsylvania Conservancy	Several agricultural best management practices in heavy farming area in impaired Yellow Creek watershed.	2008	
Multiple	\$3,773,735	DEP	PA Conservation Reserve Enhancement Program: Original, Northern Expan- sion & Ohio Basins	Watershed Protection	Pennsylvania Association of Conservation Districts, Inc.	Continue the Conservation Reserve Enhancement program in 59 counties.	2008	
Multiple	\$150,000	DEP	Project Grass Pasture Resource Protection	Watershed Pro-	Somerset County Con- servation District	Install stream bank-fencing, livestock watering systems, Fencing, access lanes, and other pasture improvement management practices on 20 farms in a 14 county area.	2008	
Multiple	\$500,000	DEP	Free-Flowing Pennsylvania 3: Ecosystem Restoration through Dam Removal	Watershed Pro- tection	American Rivers. Inc.	Design, permitting, construction, restoration, and monitoring activities for dam removal and river restoration projects statewide.	2008	
Multiple	\$131,680	DEP	Keystone College Stream- bank Stabilization Project	Watershed Pro- tection	Wyoming County Con- servation District	Streambank stabilization demonstration along the South Branch of Tunkhannock Creek.	2008	
Multiple	\$27,000	DEP	Bell's Gap Run Watershed Improvement	Watershed Protection	Altoona City Authority	Re-channel a headwater stream to direct stream flow away from an old strip mine cut & abandoned deep mine entry and re-establish flow into the Bellwood Reservoir used for public drinking water in Altoona.	2009	
Multiple	\$414.260	DEP	Restoration of Acid Rain Impacts in the Schrader Creek Watershed	Watershed Pro-	Schrader Creek Watershed Association	Restore Schrader Creek headwaters and tributaries through passive treatment systems to address the impacts of atmospheric deposition. This includes the construction of two Passive Treatment Systems and application of lime and limestone throughout the water.	2009	
Multiple	\$248,654	DEP	Morrison Cove Nutrient Reduction Initiative	Watershed Pro- tection	Western Pennsylvania Conservancy	Address Ag impaired watershed with Ag BMPs covering large area of Northern Bedford and Southern Blair counties.	2009	
Multiple	\$103,650	DEP	Little Mahoning Creek Res- toration Project	Watershed Pro-	Western Pennsylvania Conservancy	Address issues relating to excessive sedimentation and nutrient loading on 5 farms in the Little Mahoning Creek Watershed. In addition, the project would implement BMP's to control sediment on dirt and gravel roads within the watershed.	2009	
Multiple	\$400,000	DEP	Pennsylvania Automated Load Management (PALM) Initiative	PA Energy Development Authority	Powerweb, Inc.	Demand management project using a web- based, interactive trading system for load man- agement and energy procurement.	2006	
Multiple	\$491,741	DEP	Energy Farmers Implementation - Phase 1	PA Energy Development Authority	Mesa Environmental Sciences, Inc.	Install photovoltaic systems on 21 different farms throughout, totaling 120 kW of solar power in all. The purpose of this distribution, rather than one 120 kW system, is to spread the solar technology, send the message of renewable energy to all regions.	2007	
Multiple	\$701,366	DEP	46 Solar PV Systems at Government, Commercial and Nonprofit Entities	PA Energy Development Authority	TRF Sustainable Development Fund	Purchase and install 46 Solar PV systems on southeast PA buildings. The program would provide 188 kW of solar, providing 206,119 kWh/year, while displacing 254,371 lbs CO2, 1,961 lbs SO2, and 559 lbs NOx.	2007	

County	Award	Agency	Project Name	Project Type	Grantee/Contractor	Project Description	Year Awarded	County (CEIP) Selected
						Design and construct the following watershed improvements above the Bellwood drinking reservoir: divert trib flow away from deep mine

Multiple	\$68,000	DEP	Improvements	tection	Altoona City Authority	tem, and install project signs.	2007	
Multiple	\$5,200,000	DEP	PA Conservation Reserve Enhancement Program: Original, Northern Expan- sion and Ohio Basins	Watershed Pro-	Pennsylvania Associa- tion of Conservation Districts, Inc.	Continue the Conservation Reserve Enhancement program in 59 counties.	2007	
Multiple	\$140,000	DEP	Darby and Cobbs Creek Watershed Stormwater Program	Watershed Pro- tection	Pennsylvania Environ- mental Council, Inc.	PEC will follow up their technical assistance project titled "Stormwater Retrofit Demonstration Program," which was funded by CZM. That project produced conceptual designs for stormwater retrofits at 16 sites, most of them in heavily urbanized landscapes.	2007	
Multiple Total	\$36,257,555							
Statewide	\$1,826,357	Game	Lead Remediation and Upgrade of Shooting Ranges	Game Commis- sion		This project involves the repair and upgrade of existing shooting ranges across the state. Each range undergoes a lead remediation process which prevents lead from leaching into the ground or surface waters surrounding the range. Contaminated soils are treated and removed from ranges that are designated to be closed. Safety upgrades to the backstops and side berms are constructed at ranges which are designated to remain open.	2006	
Statewide	\$331,380	Game	Vegetation Management Machines	Game Commission		The habitat values on some areas of game lands have been diminished due to invasive species and other undesirable woody growth. The machines will clear invasive woody vegetation and remove undesirable or non-merchantable timber to create and early successional habitat for woodcock, whitetail deer and ruffed grouse.	2008
